Education

GLA University   September 2022 – May 2026

Bachelor of Science in Computer Science

- **Relevant Coursework:** Data Structures and Algorithms (Java), Algorithms Analysis, Database Management, Operating System, Computer Networks, Software Engineering.

Internship Experience

Bharat Intern   July 2023 – August 2023

Full-Stack Web Developer

- Designed and implemented three projects using HTML, CSS, and JavaScript, prioritizing responsive layouts and interactive features.

JP Morgan Chase & Co. (Through Forage)

Software Engineering Job Simulation

Projects

SAAS Translation App | *Next.js, Firebase, Typescript, Shadcn, Stripe Payment, NEXTAUTH*   [Link]

- Implemented subscription-based payment models, enabling users to lift restrictions through paid plans, facilitating conversation translation, user invitations, and feature restriction.

Real Estate | *MERN Stack*   [Link]

- Developed a comprehensive real estate web application, enabling users to seamlessly browse and search for properties. Leveraged React.js for the front-end and Node.js with Express.js for the back-end along with MongoDB as database.

KYC Verification | *Vue.js, Node.js, MySQL*   [Link]

- Developed a KYC verification system using Vue.js, Node.js, and MySQL. Users can register, upload documents, and verify their identity with facial recognition.

Bank Management | *PHP, MySQL, Tailwind CSS*   [Link]

- Created a bank project with PHP, MySQL, and Tailwind CSS, allowing users to deposit, withdraw, and transfer funds. Developed and styled the application using XAMPP for local deployment.

Technical Skills

Languages: JavaScript, TypeScript, PHP, Python
Frameworks/Libraries: React.js, Express.js, Next.js, Vue.js
Databases: MongoDB, MySQL, Firebase
Frontend Technologies: HTML, CSS, Tailwind CSS, Bootstrap
Other Tools: Stripe Payment, Firebase Authentication

Honors & Achievements

- **2nd Runner-Up** in Smart India Hackathon (Internal)

- Certificate of **Web Animation** using CSS

- Attended workshop on **Cloud Computing**
